1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1-3, it is not clear what is meant by the inclusion of (INDIGO) in line 1 of the claims. Does this limit the fabric to a particular color? Also, it is not clear why the first three lines of the claims are enclosed in quotation marks? Also, it is not clear what is meant by a traditional finish in line 5. In claim 2, it is not clear what is meant by "general wear"? Also, it is not clear how claim 2 further limits claim 1 in that no new structure is recited. In claim 3, it is not clear what is meant by the limitation "could receive differentiated laundry finishes in both faces". It is not clear what a differentiated laundry finish is. Again, this claim does not seem to further limit claim 1 in that no new structure is recited, since claim 3 seems to recite a capability of the fabric of claim 1.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hosogai, U.S. Patent No. 6,182,296 in view of GB 2,170,426 to Palant. Hosogai discloses a reversible denim fabric which is suitable for use in making reversible garments. Denim inherently comprises two different colored yarns, usually white in the fill and colored in the warp. Hosogai differs from the claimed invention because it does

not disclose printing on one face of the fabric. Palant teaches that fabrics for use in reversible garments can be printed on one side in order to impart a different appearance to each face. See abstract. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have printed one side of the reversible denim garment of Hosogai. One of ordinary skill in the art would have been motivated to print one side of the denim garment of Hosogai by the teaching of Palant that this would impart a different appearance to each side of the reversible garment.
